Tools Required:

- You shouldn't need any tools but if you need to enlarge the pre-drilled holes, we suggest using a drill and a 5/16" diameter bit.

Step 1: Check all parts have been received

Step 2: From the pattern of holes on the back of the rack, select a hole for installing the bracket. The horizontal holes work best but the hole pattern can vary depending on the Manufacturer.

Step 3: Push the post on the bracket through the holes from the back.

Step 4: Press the retaining clip over the bracket post as shown. You should hear a snap as it clips on.
